About Me

As a dedicated MERN stack developer, I specialize in creating dynamic and responsive web applications using MongoDB, Express.js, React.js, and Node.js. With a strong foundation in full-stack development, I excel in building user-centric solutions that meet both functional and aesthetic requirements. My expertise spans from front-end design to back-end development, ensuring seamless integration and performance. I am passionate about leveraging technology to solve real-world problems and continuously improving my skills to stay at the forefront of the industry.

Experience

Technowire Data Science ltd

Feb 2024 - present

Mern Stack Developer Intern

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, React.js and node.js.
- Collaborated with the design team to implement user-friendly interfaces and improve UX.
- Optimized website performance, reducing load times by 20%.
- Assisted in debugging and resolving cross-browser compatibility issues.

Project works

• Technowire Data Science pvt ltd

Technowire Data Science Pvt. Ltd.'s website, where cutting-edge data solutions meet innovation. Discover our expertise in transforming data into actionable insights that drive business success.

• Book my space

Developed "Book My Space" using React.js and Node.js, a platform facilitating the organization of worldwide conferences, exhibitions, and events. The project features roles for participants, organizers, and vendors, ensuring seamless event management and coordination on a global scale.
